## *Guest Speaker—Wade Cantrell*

Wade explained that we have cyber attacks because it is easy access world wide, perpetrators are easy to hide and hard to track. They seek personal financial info. 94% of the assaults come through email. He recommends shutting your computer off regularly, save data properly, use multi-factor authentication, do not share your credentials. Also, he says to report compromises to the FBI. Wade can be reached at 925-392-0182.
